Sources: CPUC broadband data collection as of December 2018; household information are based on the California Department of Finance, January, 1 2019 estimate. Broadband internet access service is assumed to be deployment to all households in census blocks where at least one household is offered service at speeds exceeding 200 kbps in at least one direction. Broadband Adoption Rate is defined as the percentage of consumer fixed broadband access connections over the total households offered Broadband internet access service.
